Chemistry for the real world: Nature derived, performance-driven chemistries can solve your toughest industrial application challenges
CMEC
SELFLEVEL® Access Assembly

Improve driveability while reducing road maintenance, inflow, and infiltration. Available for asphalt and concrete applications.

SELFLEVEL assembly floats with the roadway, keeping the surface smooth during settling and frost heave.

Protecting the structure below, traffic vibration is absorbed by the road surface.

An excellent solution for new or retrofit installations.

Visit r.ejco.com/lunch to request a lunch and learn demo or call 800 626 4653.

While Times have Changed...

Customer support remains our priority.

For 100 years the Paulsboro Refinery has been a consistent, reliable supplier of fuel oil and asphalt. With our outstanding reputation for excellent quality and competitive pricing, we are first in the eyes of our customers for being responsive to their needs.

With a continuing drive to grow geographically and expand our product mix, PBF Energy is able to deliver a variety of high quality products to our customers.

If you’re looking for timeless qualities in a supplier, please contact:

PRI Asphalt Technologies Inc. is a fully accredited, independent testing laboratory with locations in Tampa, Florida, Chicago, Illinois, Munster, Indiana, and Cadiz, Spain.

We are a worldwide leader in the Paving, Roofing and Industrial market sectors. PRI specializes in complete technical support, including testing, evaluation, and research and development of pavement materials and products.

Our staff consists of over 50 technicians, scientists and engineers trained in more than 600 Federal, State, ASTM, AASHTO, EN and International test methods. They hold certifications through NICET, NETTCP, NBTC, Asphalt Institute, and various state agencies.

PRI’s client base ranges from small private companies to major international conglomerates, and assisted government agencies, including: FHWA, FAA, state DOTs, counties, cities, and municipalities.

Quality Results from PRI are always guaranteed. We routinely participate in proficiency sample testing programs conducted by AMRL, Western States Co-op, WIE DOT, and various other state agencies.

PRI’s Technical Services
PRI Asphalt Technologies offers a full range of traditional and specialized testing, evaluations and certifications for a variety of materials and products, including:

- Conventional Asphalt Property Testing
- Asphalt Cutback Evaluations
- Asphalt Emulsion Testing
- Crack and Loop Sealants Analysis
- Crude Oil Analysis
- Liquid Anti-Strip Analysis
- Marine Fuels
- Mineral Aggregate and Fillers Testing
- Mix Designs (SP, FAA, MS, CIP, HIP, CM)
- Pavement Engineering Services
- Pavement Maintenance and Preservation
- Petroleum Coke
- PG, EN and other Binder Certifications
- Polymer-Modified Binders (PMA & PMB’s)
- Product Certifications
- Product Development and Improvement
- Recycled Materials Analysis, RAP, RAS, and others
- Refinery and Terminal Support
- Resinovator and Sealers
- Release Agent Evaluations
- Soils Evaluations
- Striping Paint Testing

Our Accreditations:
PRI maintains active accreditations with several agencies, including:
- AASHTO/Resource (AMRL), CMEC
- For Performance Grade (PG) and Conventional Binders, Mix Designs, Emulsions, Aggregates, and Cutbacks

Miami-Dade, IAS-ES
and State of Florida

Special Services
PRI Asphalt Technologies’ capabilities go far beyond traditional product and material testing. We specialize in services that are non-routine and technically complex, including procedures that require specialty equipment and expertise.

We offer technical services and support that covers every aspect of the asphalt and pavement industries.

These include:
- Accelerated Weathering Services
- Conflict Resolution
- Engineering Assessment and Reviews
- Exposure Farm
- Forensic Investigations
- LEED Product Certifications
- Litigation Support
- Patent Development and Support
- Product Development and Improvement
- Reference Testing
- Research
- Seminar / Training / Educational Presentations
- Technical Literature Writing Assistance and Preparation

World Wide Service
PRI is active in all 50 states and more than 50 foreign countries.

Visit our website at www.priasphalt.com to learn more about the services we offer.
